Distribution Planner

Nr ref.: 270/7/2026/PW/269605/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- Employment contract,
- Competitive base salary paired with bonus,
- Hybrid model of work,
- Private medical care and comprehensive life insurance,
- Unlimited access to premium training platforms and certification tracks to keep you at the cutting edge of industry trends.

Employment agency entry number 47

this job offer is intended for people over 18 years of age

What will your tasks involve?

- Supports execution of short- and long-term DRP processes to help ensure finished goods availability across markets while balancing service, inventory, and supply constraints.
- Contributes to replenishment planning and maintenance of inventory parameters (e.g., safety stock, lead times, MIN/MAX) to support stable distribution signals and network performance.
- Monitors supply risks through KPI analysis, coverage reviews, and exception tracking, escalating and supporting mitigation actions as needed.
- Participates in availability management by identifying stock risks, supporting resolution of shortages, and coordinating actions with factories, markets, and logistics partners.
- Supports execution of product lifecycle activities (Phase-In/Phase-Out) to ensure smooth transitions and continuity of supply.
- Works cross-functionally with demand, supply, logistics, and market teams to support aligned and effective planning decisions.
- Contributes to planning governance by supporting KPI reviews, supply risk discussions, and escalation processes.
- Supports continuous improvement initiatives to enhance DRP processes, tools, and data quality.

What we expect from you?

- Minimum 2 years of experience in supply chain planning, preferably in DRP, distribution, or supply planning within FMCG or international environments.
- Strong understanding of DRP concepts, inventory management, and replenishment processes across multi-market networks.
- Proven experience managing inventory parameters (safety stock, lead times, MIN/MAX) and improving service and inventory performance.

- Ability to identify, analyse, and mitigate supply risks using data, KPIs, and structured problem-solving approaches.
- Proficiency in planning systems (e.g., SAP, Blue Yonder or similar)
- Advanced Excel capabilities (Power BI, experience with SQL, data warehouses, and system implementations is a plus).
- Fluent in English, written and spoken.
- University degree or technical background (logistics, manufacturing, systems, or business is preferred).
- Readiness to work 8-hour shifts scheduled between 08:00 and 24:00.
