We are seeking an experienced Business Analyst for one of our clients, a globally recognized enterprise. This role is embedded within a dynamic product development organization responsible for delivering cutting-edge, enterprise-grade software solutions hosted on Microsoft Azure. You will play a pivotal role in bridging the gap between business stakeholders, product management, and engineering teams to drive the successful delivery of scalable, cloud-based, and AI-enabled business solutions.

Business Analyst

Nr ref.: 173/8/2026/AS/270035/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- **Long-Term Engagement:** A 1-year B2B or subcontracting agreement with a strong possibility of further long-term extensions.
- **Global Scope:** Direct impact on highly scalable enterprise software utilized by a top-tier international organization.
- **Cutting-Edge Projects:** Hands-on involvement in an environment working with modern cloud architectures (Microsoft Azure) and emerging AI technologies.
- **Total Flexibility:** A 100% remote work model, allowing you to work efficiently and comfortably on your own terms.

Employment agency entry number 47

this job offer is intended for people over 18 years of age

What will your tasks involve?

- **Requirement Elicitation & Documentation:** Translate complex business needs into clear, actionable requirements, user stories, and product capabilities for enterprise software solutions.
- **Cross-Functional Collaboration:** Act as the critical bridge connecting business stakeholders, Product Managers, Solution Architects, UX Designers, and engineering teams to ensure unified delivery.
- **Agile Product Delivery:** Work closely with Agile software delivery teams to drive development cycles, prioritize backlogs, and ensure successful, high-quality software releases.
- **Process Optimization:** Continuously analyze and improve existing business processes, ensuring that the delivered solutions are scalable, secure, and aligned with strategic organizational objectives.
- **Technology Integration:** Leverage your understanding of cloud-based applications (Microsoft Azure) and Artificial Intelligence (AI) to support the design and rollout of modern, AI-enabled business solutions.

What we expect from you?

- **Extensive Experience:** 7+ years of relevant, hands-on experience as a Business Analyst, specifically within software or product development environments.
- **Cloud & Tech Acumen:** Solid understanding of cloud-based application architectures (experience with Microsoft Azure is highly preferred) and a working knowledge of

Artificial Intelligence (AI) technologies.

- **Agile Proficiency:** Proven track record of successfully operating within Agile software delivery frameworks alongside cross-functional engineering and product teams.
- **Communication & Stakeholder Management:** Exceptional interpersonal skills with the ability to navigate between technical and non-technical domains. Fluent English (mandatory) is required to build trust with international teams.
- **Availability:** Readiness to join the project with a maximum notice period of one month.
