We are partnering with a global leader in the creative technology sector to find a **ERP Solution Specialist - MS Dynamics**. In this strategic role, you will act as a pivotal architect of change, bridging complex business processes with modern technical execution.

We are not looking for someone to simply maintain a system, but a visionary leader who will take ownership of the ERP environment's evolution within a world-class creative organization. You will translate ambitious organizational goals into actionable IT roadmaps, ensuring that technology serves as a catalyst for global success.

ERP Solution Specialist - MS Dynamics

Nr ref.: 111/4/2026/AS/268010/jobs.pl Warszawa (mazowieckie)

What we offer

- **Architectural Impact:** High level of autonomy in designing and implementing technological strategies that directly enhance global operations.
- **Expert Career Path:** A clearly defined growth plan leading toward technology leadership and industry expert roles within a mature, high-tech corporate structure.
- **Innovation-Driven Environment:** Join a team focused on digital transformation, optimization, and implementing the latest market standards (Cloud-first approach).
- **Elite Knowledge-Sharing:** An opportunity to collaborate with high-class specialists in an environment dedicated to mutual skill development and technical excellence.
- **Scale and Prestige:** Participation in high-visibility projects that ensure process continuity for products recognized by millions of users worldwide.

Your tasks

- **Strategic Consulting:** Serving as the lead ERP authority, responsible for deep technical analysis and designing long-term system implementation plans.
- **Solution Architecture:** Designing, configuring, and overseeing the deployment of advanced functionalities within the MS Dynamics 365 ecosystem (F&O / Business Central).
- **High-Level Business Partnership:** Engaging in active dialogue with Financial, Operations, and Production departments to design solutions perfectly tailored to the business's specific, large-scale needs.
- **Continuous Optimization:** Monitoring global system performance and recommending cutting-edge innovations to increase operational efficiency.
- **Technical Mentoring:** Supporting the internal IT team by sharing best practices, conducting code reviews, and building strong technical competencies within the department.

What we expect

- **ERP Background:** A proven track record of **6–8 years** working with ERP-class systems (configuration, development, and integration) in large-scale environments.
- **Dynamics 365 Expertise:** Practical, hands-on experience with MS Dynamics 365 (preferably **2 to 3 years** of active involvement in implementation or migration projects).
- **Financial Domain Proficiency:** Deep understanding of finance, accounting, and controlling areas, with the ability to solve complex domain-specific problems within IT systems.
- **Communication & Influence:** The ability to present complex technical strategies to non-

technical stakeholders and effectively collaborate with leadership teams.

- **Education:** A degree in Computer Science, Finance, or a related field. Microsoft Dynamics certifications will be considered a significant asset.
