Employment agency entry number 47

this job offer is intended for people over 18 years of age

What will your tasks involve?

- Initial assessment and qualification of customer inquiries in the automotive sector (e.g., development projects, system and software scopes).
- Maintenance of inquiries and offers in the system, ensuring high data quality.
- Coordination of interdisciplinary bidding teams along the automotive value chain, as well as timely collection and follow-up of all content-related and calculative contributions.
- Creation of competitive offers for automotive projects, including customer-specific documents (e.g., price sheets, CBDs – Cost Breakdown Sheets).
- Preparation and follow-up of best-price rounds and negotiations with OEMs and suppliers.

What we expect from you?

- First experience in bid preparation, project responsibility, or comparable roles – ideally in the automotive or engineering environment.

- Very good knowledge of German, knowledge of English is desirable
- Strong moderation skills and enjoyment in bringing different stakeholders together (e.g., development, sales, purchasing).
- Structured way of working as well as sound project and process understanding, especially in the context of complex automotive projects.
- Technical understanding in the field of vehicle development/systems engineering as well as commercial acumen.
