We are looking for an experienced and highly technical **Full Stack Lead Engineer** to join our team in Warsaw or Cracow. In this role, you will take ownership of the frontend architecture while maintaining a strong grip on backend processes and cloud deployments. If you are passionate about building scalable, high-performance applications, working with cutting-edge technologies like Generative AI, and leading technical initiatives, this is the perfect opportunity for you!

Full Stack Lead Engineer

Nr ref.: 179/8/2026/GP/270041/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- **Stable Collaboration:** A secure 1-year B2B or Sub-con contract with a strong possibility of extension.
- **Modern Tech Stack:** The opportunity to work with the latest technologies, including Gen AI, Vector DBs, and AKS.
- **Strategic Impact:** A lead role where your architectural decisions will directly shape the performance and scalability of our applications.
- **Great Locations:** Opportunity to work from our offices in Poland's major tech hubs: Warsaw or Cracow or fully remote

What will your tasks involve?

- **Frontend Development:** Design and build dynamic, high-performance user interfaces using React and Angular. Manage component lifecycles and application state using Redux, Context API, and hooks.
- **Backend & API Integration:** Design, develop, and integrate RESTful APIs using C#, ASP.NET Core MVC, Web API, and Entity Framework to ensure seamless frontend-backend communication.
- **Architecture & Optimization:** Design and optimize full-stack applications for maximum scalability, speed, and performance.
- **Cloud & Deployment:** Manage and deploy applications using Azure Kubernetes Service (AKS).
- **DevOps Practices:** Implement and maintain Continuous Integration/Continuous Deployment (CI/CD) pipelines and manage version control using Git.
- **AI Integration:** Leverage Generative AI, OpenAI, and Vector Databases to build innovative product features.

What we expect from you?

- **Overall Experience: 10+ years** of relevant software engineering experience (Mandatory).
- **Frontend Expertise:** 5–8 years of deep, hands-on experience with **React** (hooks, Redux, Context API). Proficiency in **Angular** is also strictly required.
- **Backend Proficiency:** Strong hands-on experience with **.NET Core WebAPI**, C#, ASP.NET MVC, and Entity Framework.
- **Database Management:** Solid experience with relational databases (PostgreSQL, MySQL) as

well as NoSQL systems (MongoDB, Cassandra).

- **Cloud & DevOps Skills:** Practical, hands-on experience with **AKS (Azure Kubernetes Service)**, Git, and modern CI/CD practices.
- **Emerging Tech:** Hands-on knowledge or strong familiarity with Generative AI, OpenAI APIs, and Vector DBs.
- **Language:** Fluent English communication skills are mandatory.
- **Leadership:** Ability to lead projects, make critical architectural decisions, and act as the technical Frontend Lead.
