We are looking for a highly skilled **Full Stack Developer (React + Python + GCP)** to join a multifunctional, global team working directly with our prestigious client. In this role, you will be responsible for designing and implementing highly scalable microservices architectures and building high-performance, modern user interfaces. If you are passionate about clean code, modern web technologies, and solving complex architectural challenges, this is the perfect opportunity for you.

Full Stack Developer (React+Python+GCP)

Nr ref.: 263/9/2026/GP/270508/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- **Attractive Compensation:** 155 - 165 PLN per hour (B2B/Sub-con).
- **Flexible Work Mode:** Hybrid setup allowing you to work from home, requiring only 1-2 days per week from the Client office in Warsaw.
- **Career Continuity:** A solid 6-month initial contract with a high likelihood of extension.
- **Global Impact:** The chance to work with one of the world's leading consumer goods companies (P&G) inside a modern tech stack (React + Python + GCP).

What will your tasks involve?

- Build scalable backend services and robust REST APIs using **Python** and **FastAPI**.
- Design, develop, and implement complex **microservices architectures** deployed on **GCP**.
- Develop full-stack web applications utilizing **Next.js v16**, heavily leveraging Server-Side Rendering (SSR), server actions, advanced caching strategies, and templates.
- Build highly optimized UIs with **React.js v19**, implementing context, modern hooks, memoization, and advanced performance optimization techniques.
- Write advanced, strictly typed code using **TypeScript** (including template literal types and generics).
- Implement efficient styling and layouts using **Tailwind v4** usage patterns.
- Ensure code reliability and quality by writing comprehensive unit, snapshot, and integration tests using **Jest**.
- Apply general design patterns, OOP, and **SOLID** principles to maintain a clean and scalable codebase.
- Collaborate and communicate effectively on a daily basis with a diverse, global team of engineers and stakeholders.

What we expect from you?

- **Experience:** Strictly **5+ years** of relevant commercial experience in full-stack development.
- **Mandatory Skill:** Exceptional expertise in **React**.
- **Frontend Stack:** Deep knowledge of React.js v19, Next.js v16, advanced TypeScript, and Tailwind v4.
- **Backend & Cloud:** Proven experience with Python, FastAPI, and Google Cloud Platform (GCP).

- **Computer Science Fundamentals:** Strong understanding of Data Structures & Algorithms (arrays, sets, maps, graphs, recursion).
- **Engineering Best Practices:** Strong commitment to Clean Code, Object-Oriented Programming (OOP), and design patterns.
- **Language:** Fluent **English** (Mandatory) – both strong oral and written communication skills are essential for collaborating with the global team.
