We are seeking an experienced **SAP LE/SD Consultant** with robust expertise in Sales & Distribution (SD), Logistics Execution (LE), and complex EDI and API integrations. The ideal candidate will be responsible for implementing, configuring, and supporting end-to-end Order-to-Cash (O2C) and logistics processes while ensuring seamless connectivity between SAP and external third-party applications. If you have a strong background in logistics execution and hands-on integration experience within an SAP landscape, this role offers the opportunity to drive high-impact supply chain solutions.

SAP SD-LE

Nr ref.: 265/9/2026/GP/270510/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- **Complex Engineering Challenges:** Work on large-scale, end-to-end implementations that heavily leverage modern API and EDI integration architectures.
- **Cross-Module Exposure:** Broaden your enterprise knowledge by working closely with MM, FICO, PP, and advanced supply chain modules (TM/EWM).
- **Modern Technology Landscape:** Engage with S/4HANA environments and explore emerging enterprise tech, including AI-driven supply chain solutions.
- **Professional Development:** A collaborative, global environment that champions continuous learning, certification support, and cross-functional skill building.

What will your tasks involve?

- **Experience & Education:** Bachelor’s degree in Engineering, IT, Computer Science, or a related discipline, coupled with at least **6+ years** of commercial experience in SAP SD/LE.
- **Project Delivery:** Proven experience in at least one full-cycle SAP implementation project.
- **Mandatory Skill:** Deep functional knowledge of **SAP Logistics Execution (LE)**.
- **SAP Functional Expertise:** Strong command of SAP SD (Sales Order Management, Pricing, Billing, Delivery Management, Route Determination, Credit Management).
- **Integration Proficiency:** Hands-on experience mapping and integrating external systems using EDI (ANSI X12, EDIFACT), API Integrations, IDOCs, ALE, BAPIs, and SAP PI/PO or SAP CPI platforms.
- **Cross-Functional Knowledge:** Solid understanding of integration points with SAP MM, SAP WM/EWM, SAP FICO, and SAP PP.
- **Soft Skills:** Excellent communication and stakeholder management skills, with the ability to translate complex technical concepts to business leaders.

What we expect from you?

- Hands-on experience operating within **SAP S/4HANA** environments.
- Exposure to advanced logistics modules such as SAP TM (Transportation Management) or SAP EWM.
- Familiarity with SAP CPI / PI / PO for cloud and on-premise integrations.
- Experience with Agile project delivery methodologies.

- Active SAP Certifications in SD or LE.
- **Good to Have:** Knowledge or interest in AI and Generative AI applications within enterprise resource planning and supply chain optimization.
