

Are you looking for an environment where your programming expertise and deep understanding of ERP systems will tangibly improve business operations? Join us and have a real impact on the technical architecture, development, and optimization of our core solutions.

Dynamics 365 Business Central Developer

Nr ref.: 345/9/2026/GP/270600/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- A dedicated development budget for internal and external training.
- Access to industry e-learning platforms.
- Mentoring programs and regular internal technical knowledge sharing.
- Dedicated time to develop and test your own ideas.
- **Stability & Work Model:** Employment based on an employment contract (umowa o pracę) with a flexible hybrid work model (3 days from home, 2 days from the office).
- **Culture & Communication:** An open work environment where proactivity and initiative are genuinely appreciated by both the team and management.
- **Health & Activity:** Private medical care and a sports package. For active lifestyle enthusiasts, we offer bike facilities with showers and corporate sports teams (runners, cyclists, footballers).
- **Language Support:** Subsidized English language courses.

What will your tasks involve?

- **Development & Customization:** Designing, building, and maintaining extensions for Microsoft Dynamics 365 Business Central using the AL language and Visual Studio Code.
- **System Integration:** Developing and managing integrations between Business Central and external applications utilizing APIs, Web Services (REST/SOAP), and Azure services.
- **Technical Design & Documentation:** Translating functional requirements into technical specifications and creating clean, comprehensive technical documentation for your code.
- **Testing & Debugging:** Writing automated tests, conducting peer code reviews, troubleshooting bugs, and resolving complex technical issues to ensure high system stability.
- **Deployment & Optimization:** Managing source code via version control (Git), setting up and monitoring CI/CD pipelines in Azure DevOps, and proactively optimizing system performance.
- **Collaboration:** Working closely with functional consultants, business analysts, and vendors to map out technical solutions and ensure seamless delivery of ERP enhancements.

What we expect from you?

- Minimum of 3 years of experience as a Microsoft Dynamics 365 Business Central / NAV Developer.
- Strong proficiency in AL programming and Visual Studio Code (knowledge of C/AL is a plus for legacy system migrations).

- Proven track record of building and publishing Business Central extensions and participating in ERP implementations or upgrade projects.
- Practical experience with code versioning tools (Git) and application lifecycle management (Azure DevOps).
- Fluent communication in English (min. B2 level).
- Excellent time management and problem-solving skills, with the ability to work independently while fostering a collaborative, creative team spirit.
- Openness to occasional business travel.

You Will Earn Extra Points If You Have (Nice to Have)

- Microsoft certifications validating Business Central Developer expertise (e.g., MB-820: Microsoft Dynamics 365 Business Central Developer).
- Experience with the broader Microsoft ecosystem, particularly Power Platform (Power Automate, Power Apps, Power BI).
- A basic understanding of accounting principles, financial reporting, and standard business workflows.
- Working knowledge of MS SQL Server and database performance troubleshooting.
