On behalf of our client, a leading global bank, Randstad is currently seeking a Test Automation Engineer to join their dynamic team in the heart of Warsaw. This is an excellent opportunity to advance your career within a truly international environment where English is the primary language of communication.

Test Automation Engineer

Nr ref.: 29/10/2026/PW/270770/jobs.pl Warszawa (mazowieckie)

What you can expect from us?

- An attractive salary based on your experience (details will be provided during a phone interview),
- B2B contract with the possibility of long-term cooperation,
- A flexible hybrid work model (50% from our modern office in central Warsaw, 50% remote),
- The opportunity to join a private medical care plan and a sports card program,
- The chance to work in a multicultural, prestigious, and professional environment.

Employment agency entry number 47

this job offer is intended for people over 18 years of age

What will your tasks involve?

- Design, build, and maintain automated test suites at UI and API levels,
- Integrate automated tests into CI/CD pipelines for continuous regression coverage,
- Collaborate with developers to identify test coverage gaps and edge cases early in the development cycle,
- Perform root-cause analysis on test failures and defects, working with developers resolve issues,
- Maintain test data management and environment stability for automated test execution,
- Report on test coverage, quality metrics, and release readiness to the team.

What we expect from you?

- 5–7 years of practical experience in software test automation,
- Experience with UI automation frameworks (e.g., Selenium, Cypress, Playwright),
- Experience with API test automation tools (e.g., Postman, RestAssured, Karate),
- Working knowledge of Java or .NET / JavaScript for writing and maintaining automation code,
- Familiarity with CI/CD pipelines and containerized test environments,
- Performance/load testing experience (JMeter, Gatling),
- Financial services or transfer agency domain exposure.
